

### PAINTED BONDWEB BACKGROUNDS

**Materials:**

Base fabric(cotton, felt, craft vilene)  
Silk paint and/or diluted acrylic paint  
Bondaweb  
Baking parchment to protect iron.

**Method:**

Paint the rough side of the bondaweb with liquid paint. Colours can be mixed. Diluted metallic acrylic paint adds highlights. Paint must be applied gently. The bondaweb will wrinkle into interesting texture.

Leave to dry completely, then iron bondaweb onto fabric paint side down with medium heat. Allow to cool before carefully peeling away backing paper. The surface will harden a little, but will still be adhesive if ironed.
